2.	Construction now	under way at Al	tes Lager includes:	·		
			concrete runway.		ng its	

- a. Laying down of a new NNE/SSV concrete runway. High poles marking its length probably are stands for night lighting. Estimated size on completion: 1,800-2,000 meters long by 50 meters wide. At present, work is limited to the southern third of the runway (see item 82 on map attachment).
- b. A new taxi strip, as evidenced by the earth works and cleared land east of the runway (9 on map).
- c. Two new buildings, for which foundations have been completed. (10)
- d. A spur line with temporary loading ramp (12), joining the Luckenwalde-Wittenberg line, to facilitate the importation of construction materials.
- e. Another rail spur to the east of the above line. Its destination could not be determined.
- Local residents claim that additional clearance of the wooded area west of the airfield is planned.

Attachment: Sketch map of Altes Lager airfield.*
